LAB 05

Case 1 – Global Site GPS

1. Rename the Sheet1 as Production History and then insert 14 new rows at the top of the worksheet.
2. Increase the width of column A to 23 characters and the width of columns B through F to 14 characters.
3. In the range B7:F7, enter the titles **Plant1, Plant2, Plant3, Plant4** and **Plant5**.
4. In the range A8:A11, enter **Total Units Produced, Average per Month, Maximum,** and **Minimum**.
5. Select the range B26:F26, use AutoSum to calculate the sum of the production values for each plant. Drag and drop the selected cells to the range of B8:F8.
6. In the same way, calculate the **average values** (drag and drop the selected cells to the range B9:F9), **maximum values** (drag and drop the selected cells to the range B10:F10), and **minimum values** (drag and drop the selected cells to the range B11:F11).
7. In the Production History worksheet, enter the following data:

Cell	Data	Cell	Data
A1	**Global Site GPS**		
A2	**Production Report**		
A3	**Model**	B3	**MapTracker 201**
A4	**Year**	B4	**2026**
A5	**Total Units Produced**		

8. In cell B5, use the SUM function to sum the values in the range of B8:F8.
9. Insert a new worksheet named **Plant Directory** as the first worksheet in the workbook.
10. In cells A1 and A2, enter **Global Site GPS** and **Plant Directory**, and then enter the text, shown below, in the range A4:D7, making sure that the address is entered on two lines within the cell.

Plant	Plant Manager	Address	Phone
1	**Karen Brookers**	**300 Commerce Avenue Crestwood, MO 63126**	**(314) 555-3881**
2	**Daniel Gomez**	**15 North Main Street Edison, NJ 08837**	**(732) 555-0012**
3	**Jody Hetrick**	**3572 Howard Lane Weston, FL 33326**	**(954) 555-4817**

11. Insert a new worksheet named **Documentation** as the first worksheet in the workbook, and then enter the following data:

Cell	Data	Cell	Data
A1	**Global Site GPS**		
A3	**Author**	B3	*your name*
A4	**Date**	B4	*the current date*
A5	**Purpose**	B5	**Production report for Global Site GPS**
