**LAB 07**

1. Open the Crockett workbook and save the workbook as **Crockett_Portfolio_LastName_FirstName_2025**. In the Documentation sheet, enter your name in cell B3 and the date in cell B4.
2. In the Composition worksheet, select the range A3:B8, and then insert a **2D pie chart**. Move and resize the embedded pie chart to cover the range D1:G9 in the Portfolio Report worksheet.
3. Move the **legend** to the left side of the chart area. Change the **chart title** to "Composition". Change the fill color of the "Cash" **slice** to yellow. Add **data labels** that show the percentage of each pie slice to two decimal places outside of the pie chart.
4. Change the pie chart to a **3D pie chart** and set the 3D rotation of the x-axis to 230° and the y-axis to 40°.
5. In the Sector Weightings worksheet, select the range A3:D15, and then insert a **2D clustered column chart**. Move and resize the embedded chart to cover the range A12:D25 in the Portfolio Report worksheet.
6. Change the font size of the axis labels and legend to 8 points. Insert the **chart titled** "Sector Weightings" over the plot. Change the format of the percentages in the **vertical axis** to display no decimal places. Overlay the **legend** at the top of the chart.
7. Change the cart type of the S&P 500 series to a **line chart**, remove the line connecting the markers in the chart, and then change the marker type to a solid horizontal line of size 10.
8. Change the fill color of the columns for the Portfolio data series to the color of your choice. Set the **gap width** of the columns in the Portfolio data series to 30%.
9. In the Portfolio Value worksheet, select the range A3:B127, and then insert a **2D area chart**. Move and resize the chart to cover the range D28:G42 in the Portfolio Report worksheet. (Hint: You will need to scroll down the Portfolio Report worksheet to locate the chart when you move it from the Portfolio Value worksheet).
10. Remove the chart legend. Change the fill color of the data series to the theme color of your choice.
11. For horizontal axis, set the **major unit tick mark** at two years and the **minor unit tick mark** interval at one year. Use a custom format that displays the horizontal axis date values as four-digit year values.
12. In the Portfolio Value worksheet, select the range A3:B127, and insert a **3D area chart**. Move the embedded chart into a new chart sheet named "Cover Sheet".
13. Change the chart style to Style 34 (Hint: located in the fifth row and second column of the Chart Style gallery). Remove the display of the horizontal, vertical, and depth axes. Remove the chart legend.
14. For the 3D rotation, set the x-axis to 60°, the y-axis to 10°, the perspective to 40°, and the depth of the base to 2000.
15. Change the chart title to "Crockett Family Portfolio". Set the font size of the chart title to 40 points.
16. Insert two 5-pointed stars, one directly to the left and the other directly to the right of the chart title. Align the middle of the two stars and then group them into a single object.
